## ASSESSMENT GUIDELINES

### GENERAL POLICY

**Assessment Period:** The assessment period begins at the start of term one and finishes in Term 4 - 2023.

**Reporting to students and parents:** As each assessment task is completed students will receive full and detailed information regarding their performance in the task. School reports will be issued in Term 2 and Term 4.

### SCHOOL ASSESSMENT

The school's assessment is intended to provide an indication of a student's attainment which is based on:

1. a wider range of syllabus objectives than is measured by examinations;
2. measures and observations obtained throughout the course.

The assessments are intended to measure students' progress relative to syllabus outcomes.

Students will be given an assessment task notification in writing at least two weeks prior to an assessment task.

### RULES AND PROCEDURES

1. No marks will be given for assessment tasks that are not received by the due date and time.
2. Anyone identified as cheating will have their task cancelled and will be awarded zero.
3. Students found to be attempting to cheat will have their parents contacted by the Head Teacher of the subject.
4. Assessments prepared at home will be due to the subject teacher during the subject period timetabled for that day.
5. Assessments submitted in periods after the scheduled subject period will be awarded zero.
6. ***Illness/Misadventure*** - If a student is ill, or owing to reasons of genuine misadventure, is unable to attend on the day of an in-class assessment task, parents are asked to notify the school by telephone by 9 am of that day.
7. If a student fails to complete an assessment task by the due date through illness then they must produce a medical certificate so as not to incur a penalty and to have an extension of time granted. In all other situations, it will be at the discretion of the Principal and/or the relevant Head Teacher to determine whether an extension of time will be granted.
8. The student must hand in the assessment task or sit the examination on the day of return to school even if the student does not have that subject scheduled on that day.

### AWARD OF RECORD OF SCHOOL ACHIEVEMENT

It is expected that students who take part in any of NESA's courses will reach some or all of the outcomes of those courses. A student will be considered to have satisfactorily completed a course if, in the Principal's view, there is sufficient evidence that the student has:

1. followed the course developed or endorsed by NSW Education Standards Authority (NESA);
2. applied themselves with diligence and sustained effort to the set tasks and experiences provided in the course by the school; **and**
3. achieved some or all of the course outcomes.

Students who have not complied with the above requirements may be regarded as not having satisfactorily completed the course.

Students may be deemed not to have satisfactorily completed a course if there is sufficient evidence of omission, to a significant degree, of experiences which are in-class. **This includes all class work tasks, not only those outlined in this assessment schedule.** In cases of non-satisfactory completion, an "N" award will be submitted on the appropriate form. Students who have received a minimum of two "N" award warnings may be given an "N" determination in that subject.

The award of the Record of School Achievement (RoSA) is conditional upon satisfactory attendance, application with diligence and sustained effort, and completion of Year 10 course requirements.

As a result of absence, the course outcomes may not be met. Absences will be regarded seriously by the school.

Students will receive an early warning of the consequences of such absences.

**Students must satisfactorily complete the Year 10 Record of School Achievement to satisfy entry requirements for preliminary courses in Year 11.**

If it appears that a student is at risk of not meeting requirements in a course, a warning must be given.

The school must:

1. advise the student/parent, in writing, in time for the issue to be addressed;
2. hand the warning to the student/parent or email the letter to the parent's email address;
3. request from the student/parent a written acknowledgement of the warning;
4. retain a copy of the warning notice.

### CONDUCT DURING ASSESSMENT TASKS

Assessment tasks completed during class hours involve the normal rules applicable to formal external examinations - (refer below "Conduct during the Examination").

If tasks which constitute more than half the numerical value of the total assessments are not completed (without valid authorisation) the subject will be regarded as not having been studied satisfactorily.

If this occurs, the subject will not be listed on the Record of School Achievement (RoSA). Early warning in writing will be given to students and parents if such a situation appears to be developing.

## YEARLY EXAMINATIONS

### SPECIAL EXAMINATION PROVISIONS FOR STUDENTS WITH DISABILITIES

1. If a student has a disability which would, in a normal examination situation, prevent him/her from:
  - a) reading and interpreting the examination questions; **and/or**
  - b) communicating knowledge or understanding to an examiner as effectively as a student without a disability, the school may approve special examination provisions.
2. Emergency provisions can be arranged if the student has had an accident just before the exam.
3. An application should contain recent evidence of the disability and, in some cases, examples of the student's work. The parent/caregiver may need to organise required eligibility testing early in the year. This may be done through the school counsellor.
4. Special provisions are **NOT** available:
  - a) as compensation for difficulties in undertaking a course, or preparing for the exam;
  - b) for lack of familiarity with the English language.
5. Certain special provisions may not be available for:
  - a) oral/aural language examinations;
  - b) music and drama practical examinations;
  - c) courses requiring the use of manipulative skills e.g. visual art.
6. Teachers will make all reasonable effort to accommodate special provisions in class-based assessment tasks.

### EXAMINATION DATES AND TIMES

If an examination is missed because the student has misread the timetable, the student will not receive an examination mark in that course. The student cannot make an illness/misadventure appeal on these grounds.

If the student is more than one hour late, he/she will not normally be admitted to the examination room.

### EQUIPMENT FOR THE EXAMINATION

1. Before the examination, it is the students' responsibility to clarify:
  - a) equipment that should be provided;
  - b) items which will be provided by the exam supervisor;
2. Examination supervisors will inspect any equipment brought into the examination room.
3. Equipment should bear only the original inscribed information. All materials must be in working order (this includes calculators). Students cannot appeal on the grounds that examination equipment did not work correctly.
4. Calculators may only be used if they are models approved by NSW Education Standards Authority.  
  
Prior to the examination, the student's calculator should be verified with the teacher.
5. Equipment is not permitted to be borrowed during examinations.

### CONDUCT DURING THE EXAMINATION

1. Students must follow the day-to-day rules of the school when sitting for examinations. Failure to observe these rules may result in a non-award ("N" Award).
2. Students must follow the supervisor's instructions at all times and must behave in a polite and courteous manner towards the supervisors and other students.
3. A student must **NOT**:
  - a) eat in the examination room;
  - b) speak to any person other than the supervisor during an examination;
  - c) behave in a way likely to disturb the work of any other students or upset the conduct of the examination;
  - d) attend an examination while under the influence of alcohol or illegal drugs;
  - e) take a mobile phone or communications device into the room.
4. If a student does not follow these rules, or cheats in the examinations in any way, he/she will be reported to the Principal and may be removed from the examination room and receive zero marks.
5. If a student does not make a serious attempt at an examination, he/she will not receive a mark in that course and may be deemed not to have satisfactorily completed courses that comprise the pattern of study required by NESA for the award of the RoSA.

Teachers will bring to the Principal's attention examination answers which contain frivolous or objectionable material.

Answers not written in English, except where required or permitted by the question paper, may be classified as non-serious.

## RECORD OF SCHOOL ACHIEVEMENT (RoSA)

### ELIGIBILITY

The Record of School Achievement is awarded by NESA to eligible students at the end of Year 10.

To receive the Record of School Achievement (RoSA), students are required to study courses in each year in Years 7-10 in:

English, Mathematics, Science, Human Society and Its Environment, and Personal Development, Health and Physical Education.

At some time during Years 7-10, students are also required to study courses in Creative Arts, Technology and Applied Studies and Languages other than English.

### CREDENTIAL

The RoSA records completed Stage 5 (Year 9 & 10) courses.

The RoSA is a **cumulative credential** in that it allows students to accumulate their academic results until they leave school.

The RoSA records all courses a student has completed, along with the grade awarded.

In New South Wales, a standards-referenced approach is used to report student achievement.

Achievement standards have two important components that can be thought of in terms of **what** and **how well**:

- **what** students are expected to learn; and
- **how well** they have achieved.

The NSW syllabuses state **what** students at each stage are expected to learn.

A to E grade scales describe **how well** students have achieved.

### AWARDING GRADES – COMPLETING YEAR 10

Mosman High School is responsible for awarding each student who completes a Stage 5 course or a Stage 6 Preliminary course (except VET courses) a grade to represent that student's achievement. The grade is reported on the student's RoSA.

A grade (A, B, C, D, or E) is awarded to summarise the student's achievement in any 100 hours or 200 hours course completed in Stage 5. In Mathematics, grades have been further differentiated to nine levels (A10, A9, B8, B7, C6, C5, D4, D3 and E2).

Teachers use Stage 5 course performance descriptors to determine Stage 5 grades. The descriptors have been developed from NESA's general performance descriptors (see below).

### DETERMINING STAGE 5 GRADES

During the course teachers collect information on the achievement of each student. To allocate a grade to a student at the end of the course, teachers make a judgement as to which grade descriptor best describes the achievement of that student.

Teachers make professional on-balance judgements to decide which grade description best matches the standards their students have achieved.

Students with special education needs may require adjustments to assessment activities to enable access to the task and equitable opportunity to demonstrate what they know and can do.

Teachers follow a process of 'moderation' to ensure that grades awarded are consistent with published standards. This means that the grade a student receives in one school can be compared to the same grade anywhere in NSW.

Teachers moderate their judgements by comparing work samples for their students with samples aligned to grades A to E.

## RECORD OF SCHOOL ACHIEVEMENT (RoSA) – Con'd

### RECORD OF SCHOOL ACHIEVEMENT (RoSA) – APPEALS AGAINST GRADES FOR STAGE 5

Students wishing to appeal against the grade(s) in any subject awarded to them by the school should submit a written appeal, together with evidence, to their principal.

In order to be successful in such appeals, students would need to substantiate that the grade(s) awarded in the course(s) was inconsistent with the progressive reporting from the school. If the appeal is upheld, the principal should send notification of the new grade(s) to the NSW Education Standards Authority (NESA).

Where possible, all reviews of the grade(s) awarded in any subject should be resolved within the school. However, provision has been made for subsequent appeals to NESA.

NESA will consider only whether:

- the school review process was adequate for determining whether the procedures used by the school for determining the grade(s) conform with NESA advice and the school's policy regarding the grading of student achievement
- the conduct of the school review was proper in all respects.

Since the appeal is directed to the progressive reporting by the school, NESA will not revise individual tasks or test marks.

If the appeal is upheld, NESA will refer the matter back to the school for a further review.

## GENERAL PERFORMANCE DESCRIPTORS

The general performance descriptors describe performance at each of five grade levels.

A	The student has an extensive knowledge and understanding of the content and can readily apply this knowledge. In addition, the student has achieved a very high level of competence in the processes and skills and can apply these skills to new situations.
B	The student has a thorough knowledge and understanding of the content and a high level of competence in the processes and skills. In addition, the student is able to apply this knowledge and these skills to most situations.
C	The student has a sound knowledge and understanding of the main areas of content and has achieved an adequate level of competence in the processes and skills.
D	The student has a basic knowledge and understanding of the content and has achieved a limited level of competence in the processes and skills.
E	The student has an elementary knowledge and understanding in few areas of the content and has achieved very limited competence in some of the processes and skills.

Teachers will arrive at judgements by taking into account strengths and weaknesses in performance across a range of contexts and over a period of time, gathering evidence on a number of assessment activities.

### 'N' DETERMINATIONS

'N' determinations are issued to students who do not complete the requirements for a course.

- Schools issue warning letters (N awards) to students who are in danger of not meeting course completion criteria, giving the student time for the problem to be corrected.
- If a student has been given an 'N' determination in a mandatory course, they will not be eligible for the RoSA. If they leave school, they will receive a Transcript of Study that will list the mandatory course(s) for which an 'N' determination was given. The words 'Not completed' will appear next to each 'N' determined course.
- If a student is given an 'N' determination in a non-mandatory course, the course will not appear on their RoSA or Transcript of Study.

***The assessment dates listed in this booklet may be subject to change.***

***A student should check with his/her teacher to confirm when assessments are due.***

***A student should have 2 weeks' notice of an upcoming assessment task.***

## Subject Choices (Alphabetical)

### MANDATORY

#### ENGLISH

##### Assessments 2023

Due Date	Weighting %	Task description	Outcomes assessed	Mode Assessed
1. Term 1 - Week 8	20	Common Module – Shakespeare	EN5 1A, 5C, 8D	Multimodal
2. Term 2 - Week 4	25	Common Module – Half Yearly Exam Comprehension & Creative	EN5 2A, 3B, 4B, 5C	Reading Writing
3. Term 3 - Week 4	25	Module B – Critical Study of Literature	EN5 6C, 7D, 9E	Writing
4. Term 4 - Week 2	30	Module A - Comparative Study of Texts	ENG5 4B, 6C, 7D	Writing
5. Term 4 - Week 9	N/A	Module C - Dystopian Cities	ENG5 3B, 5C, 8D, 9E	Imaginative
<b>Total</b>	<b>100</b>			

#### ENGLISH – OBJECTIVES AND OUTCOMES

These outcomes are derived from the Stage 5 English objectives and syllabus requirements. The outcomes are set for each stage of learning and are used for programming and for assessing student achievement. They specify the intended result of student learning.

Through responding to and composing a wide range of texts and through the close study of texts, students will develop skills, knowledge and understanding in order to:

- EN5-1A responds to and composes increasingly sophisticated and sustained texts for understanding, interpretation, critical analysis, imaginative expression and pleasure;
- EN5-2A effectively uses and critically assesses a wide range of processes, skills, strategies and knowledge for responding to and composing a wide range of texts in different media and technologies;
- EN5-3B selects and uses language forms, features and structures of texts appropriate to a range of purposes, audiences and contexts, describing and explaining their effects on meaning;
- EN5-4B effectively transfers knowledge, skills and understanding of language concepts into new and different contexts;
- EN5-5C thinks imaginatively, creatively, interpretively and critically about information and increasingly complex idea and arguments to respond to and compose texts investigates the relationships between and among texts;
- EN5-6C investigates the relationships between and among texts;
- EN5-9E purposefully reflects on, assesses and adapts their individual and collaborative skills with increasing independence and effectiveness.

## ENGLISH – OBJECTIVES AND OUTCOMES (Cont'd)

### Knowledge, understanding and skills

Through responding to and composing a wide range of texts and through the close study of texts, students will develop skills, knowledge and understanding in order to:

- communicate through speaking, listening, reading, writing, viewing and representing;
- use language to shape meaning according to purpose, audience and context;
- think in ways that are imaginative, creative, interpretive and critical;
- express themselves and their relationships with others and their world;
- learn and reflect on their learning through their study of English.

### Values and attitudes

Students will value and appreciate:

- the importance of the English language as a key to learning;
- the power of language to explore and express views of themselves, others and the world;
- the power of effective communication using the language modes of speaking, listening, reading, writing, viewing and representing;
- the role of language in developing positive interaction and cooperation with others;
- the diversity and aesthetics of language through literary and other texts;
- the independence gained from thinking imaginatively, interpretively and critically;
- the power of language to express the personal, social, cultural, ethical, moral, spiritual and aesthetic dimensions of human experiences.

## HISTORY – OBJECTIVES AND OUTCOMES

A student:

- 5.1 explains and assesses the historical forces and factors that shaped the modern world and Australia;
- 5.2 sequences and explains the significant patterns of continuity and change in the development of the modern world and Australia;
- 5.3 explains and analyses the motives and actions of past individuals and groups in the historical contexts that shaped the modern world and Australia;
- 5.4 explains and analyses the causes and effects and developments in the modern world and Australia;
- 5.5 identifies and evaluates the usefulness of sources in the historical inquiry process;
- 5.6 uses relevant evidence from sources to support historical narratives, explanations and analyses of the modern world and Australia;
- 5.7 explains different contexts, perspectives and interpretations of the modern world and Australia;
- 5.8 selects and analyses arrange of historical sources to locate information relevant to an historical inquiry;
- 5.9 applies a range of relevant historical terms and concepts when communicating an understanding of the past;
- 5.10 selects and uses appropriate oral, written, visual and digital forms to communicate effectively about the past for different audiences.

## MATHEMATICS – OBJECTIVES AND OUTCOMES

The purpose of assessment is to gather valid, reliable and useful information about student learning in order to monitor student achievement, guide teaching and learning opportunities, and to provide ongoing feedback to students to improve learning. In year 10 mathematics, students are awarded grades that are differentiated into nine levels: A10, A9, B8, B7, C6, C5, D4, D3, E2. Teachers will arrive at judgements for grades on the basis of evidence of student achievement on a number of assessment activities and with reference to the course performance descriptors.

In some instances, where students appear to be on the borderline between two grades, it may be necessary to also consider student achievement in assessments other than the ones outlined above.

**The performance descriptors are given to each student at the beginning of the year and the process of awarding grades is fully explained.**

The Stage 5 outcomes in the mathematics course are divided into the following strands:

- Working Mathematically;
- Number and Algebra;
- Measurement and Geometry;
- Statistics and Probability.

For more detailed information on the stage 5 content and outcomes refer to the NESA website:

<https://syllabus.nesa.nsw.edu.au/mathematics/mathematics-k10/outcomes/>

## PDHPE

### Assessments 2023

Task number Date	Weighting %	Task description	Outcomes assessed	Component
1. Term 1 – Week 10	20	PE Practical	PD5.4, PD5.5	Volleyball
2. Term 2 – Week 4	30	Half Yearly Exam	PD5.2, PD5.9	
3. Term 3 – Week 8	20	Research Task	PD5.1	Overcoming Adversity
4. Term 4 – Week 3	30	Practical Assessment	PD5.4, PD5.5	Netball/Basketball
<b>Total</b>	<b>100</b>			

## PDHPE – OBJECTIVES AND OUTCOMES

A student:

PD5-1 assesses their own and others' capacity to reflect on and respond positively to challenges;

PD5-2 researches and appraises the effectiveness of health information and support services available in the community;

PD5-3 analyses factors and strategies that enhance inclusivity, equality and respectful relationships;

PD5-4 adapts and improvises movement skills to perform creative movement across a range of dynamic physical activity contexts;

PD5-5 appraises and justifies choices of actions when solving complex movement challenges;

PD5-6 critiques contextual factors, attitudes and behaviours to effectively promote health, safety, wellbeing and participation in physical activity;

PD5-7 plans, implements and critiques strategies to promote health, safety, wellbeing and participation in physical activity in their communities;

PD5-8 designs, implements and evaluates personalised plans to enhance health and participation in a lifetime of physical activity;

PD5-9 assesses and applies self-management skills to effectively manage complex situations;

PD5-10 critiques their ability to enact interpersonal skills to build and maintain respectful and inclusive relationships in a variety of groups or contexts;

PD5-11 refines and applies movement skills and concepts to compose and perform innovative movement sequences.

## SCIENCE

### Assessments 2023

Task number Date	Weighting %	Task description	Outcomes assessed	Component
1.Term 1 – Week 7	20	Investigation & Experimental Report (in-class)	SC5-10PW, SC5-4WS, SC5-5WS, SC5-6WS, SC5-7WS, SC5-8WS, SC5-9WS	Motion & Energy
2.Term 2 – Week 4	30	Hal-yearly Exam	SC5-10PW, SC5-11PW, SC5-4WS, SC5-5WS, SC5-6WS, SC5-7WS, SC5-8WS, SC5-9WS and if possible SC5-16CW, SC5-17CW	Motion & Energy and if possible a part of Elements & Chemical Reactions
3.Term 3 – Week 2	20	Individual Student Research Project	SC5-4WS, SC5-5WS, SC5-6WS, SC5-7WS, SC5-8WS, SC5-9WS	Design and perform Investigation and write an Experimental Report
4.Term 4 – Week 1	30	Yearly Exam	SC5-15LW, SC5-16LW, SC5-4WS, SC5-6WS, SC5-6WS, SC5-7WS, SC5-8WS, SC5-9WS and if possible SC5-12ES	Genetics & Biotechnology and if possible a part of Universe
<b>Total</b>	<b>100</b>			

## SCIENCE – OBJECTIVES AND OUTCOMES

A student:

- SC5-4WS develops questions or hypotheses to be investigated scientifically;
- SC5-5WS produces a plan to investigate identified questions, hypotheses or problems, individually and collaboratively;
- SC5-6WS undertakes first-hand investigations to collect valid and reliable data and information, individually and collaboratively;
- SC5-7WS processes, analyses and evaluates data from first-hand investigations and secondary sources to develop evidence-based arguments and conclusions;
- SC5-8WS applies scientific understanding and critical thinking skills to suggest possible solutions to identified problems;
- SC5-9WS presents science ideas and evidence for a particular purpose and to a specific audience, using appropriate scientific language, conventions and representations;
- SC5-10PW applies models, theories and laws to explain situations involving energy, force and motion;
- SC5-11PW explains how scientific understanding about energy conservation, transfers and transformations is applied in systems;
- SC5-12ES describes changing ideas about the structure of the Earth and the universe to illustrate how models, theories and laws are refined over time by the scientific community;
- SC5-13ES explains how scientific knowledge about global patterns of geological activity and interactions involving global systems can be used to inform decisions related to contemporary issues;
- SC5-14LW analyses interactions between components and processes within biological systems;
- SC5-15LW explains how biological understanding has advanced through scientific discoveries, technological developments and the needs of society;
- SC5-16CW explains how models, theories and laws about matter have been refined as new scientific evidence becomes available;
- SC5-17CW discusses the importance of chemical reactions in the production of a range of substances, and the influence of society on the development of new materials.

## MUSIC – OBJECTIVES AND OUTCOMES

A student:

- 5.1 performs repertoire with increasing levels of complexity in a range of musical styles demonstrating an understanding of musical concepts;
- 5.2 performs repertoire in a range of styles and genres demonstrating interpretations of musical notation and the application of technology;
- 5.3 performs music selected for study with appropriate stylistic features demonstrating solo and ensemble awareness;
- 5.4 demonstrates an understanding of the musical concepts through improvising, arranging, and composing in styles or genres of music selected for study;
- 5.5 notates own compositions, applying forms of notation appropriate to the music selected for study;
- 5.6 uses different forms of technology in the composition process;

- 5.7 demonstrates an understanding of musical concepts through the analysis, comparison, and critical discussion of music from different stylistic, social cultural and historical contexts;
- 5.8 demonstrates an understanding of musical concepts through aural identification, discrimination, memorisation and notation of the music selected for study;
- 5.9 demonstrates an understanding of musical literacy through the appropriate application of notation, terminology and the interpretation and analysis of scores used in music selected for study;
- 5.10 demonstrates an understanding of the influence and impact of technology in music.

## iSTEM – OBJECTIVES AND OUTCOMES

A student:

ST5.1 Designs and develops creative, innovative and enterprising solutions to a wide range of STEM – based problems

ST5.2 demonstrates critical thinking, creativity, problems solving, entrepreneurship, engineering skills and decision-making techniques in a range of STEM contexts

ST5.3 applies engineering design processes to address real-world STEM-based problems

ST5.4 works independently and collaboratively to produce practical solutions to real-world scenarios

ST5.5 analyses a range of contexts and applies STEM principles and processes

ST5.6 selects and safely uses a range of technologies in the development, evaluation and presentation of solutions to STEM-based problems

ST5.7 selects and applies project management strategies when developing and evaluating STEM-based design solutions

ST5.8 uses a range of techniques and technologies to communicate design solutions and technical information for a range of audiences

ST5.9 collects, organises and interprets data sets using appropriate mathematical and statistical methods to inform and evaluate design decisions.

ST5-10 analyses and evaluates the impact of STEM on society and describes the scope and pathways into employment.

## **ATTACHMENT 1**

### **Application to Head Teacher for Consideration in relation to an Assessment Task**

Students must apply for consideration regarding any missed assessment task or examination.

Documentation, as detailed in the MHS Assessment Policies Booklet, must accompany any application.

The Head Teacher and the faculty involved will consider each application, on its merits, and the student will be advised of the outcome via this form.

Note that in the event that an assessment task/examination is missed, it is the responsibility of the student to notify the school without delay and to contact the relevant Head Teacher on the **first** day of attendance, after the missed task.

Refer to point 6 of Rules of Assessment. If the consideration is granted then, as written in the Assessment policies booklet:

- a substitute task/exam may be granted, **or**
- an estimate may be given.

If, after careful consideration, the student, and/or parent(s) consider that there are grounds to appeal the Head Teacher's decision, the section of the form relating to appeals should be completed and submitted with relevant supporting documentation to the Principal. The Principal will form an appeals panel.

This panel will meet to determine the outcome of the appeal.

**After final deliberations, a copy of the form is to be included in the student's file.**
